"Bir—In response to the request contained in your communication of the Market inst., I transmit herewith a statement showing in detail the amounts remaining uniasued of bonds authorized to be issued prior to Dec. 31, 1894.
"So far as the Finance Department is informed, none of the City Departments having charge of works, the expense of which is defrayed from the proceeds of bonds, has incurred any liability in excess of amounts duly authorized to be expended therefor.

There are, however, certain claims pended therefor.

There are, however, certain claims painst the city arising principally out the acquisition of land by condemnation proceedings, for the liquidation of high bonds have not yet been anthorised.
"In some cases the amounts of these claims are known, as, for example, Mulberry Bend Park (Chapter 320, Laws of 1877), 31,522,055.69; College Place Opening Amount assessed on city), \$778,772,36 berry Bend Park (Chapter 320, Laws of 1887), \$1,522,665.60; College Place Opening (amount assessed on city), \$778,772.56 (these bonds were authorized to be issued by the Board of Estimate and Apportionment, Jan. 10, 1885; Riverside Avenue Widening, \$39,856.6.

"Among other similar proceedings which have not yet progressed to that stage where the amount of the city's liability can be determined, may be mentioned the Washington Bridge Park, approaches to Macomb's Dam Bridge, and the acquisition of the several parks authorized by the Legislature of 1844.

"Certificates have been filed from the Change of Grade Damage Commission, in the Twenty-third and Twenty-fourth Wards, amounting to \$101,150, but it is believed that this will prove but a small percentage of the fotal awards."

"I shall be pleased to furnished you with any additional information in regard to these matters that you may desire. Very respectfully.

NEW YORK, March 14, 1855.

Hon. William L. Strong, Mayor.

Dear Sir: In response to your communication of the 9th inst., I transmit herewith a statement showing, approximately, the liability of the city for public works and improvements, which, on Jan. 1855, still remained to be met out of the proceeds of bonds then unissued.

Accurate figures have been given of the amounts of the several issues of bonds remaining unissued on Jan. 1, 1855, upon authorizations thereof, for contracts of fixed amounts; but in the case of certain public works, such, for example, as the "Cornell Dam," exact figures cannot be given, since the correctness of the original estimate depends upon the correctness of the engineer's estimate of the several items of contract, and may uitimately prove to be too much or too little.

In a number of other public improve-

ultimately prove to be too much or too little.

In a number of other public improvements, such as the Jerome Park Reservoir, the Elm street widening, the public parks authorized by the Legislature of 1894, etc., it is difficult to form even an approximate estimate of the probable cost, since this will depend upon future action of City Boards, and of Commissioners of Appraisal, and the courts. In some of these instances i have not attempted to make any estimate.

mate.

I have not included assessment bonds in this statement for the reason that the law contemplates their redemption from the payment of assessments by property-owners. Very truly yours.
